Gem Guard Wallet Mission

As of April 2021, the realm of cryptocurrency was still infancy. The economic world was still trying to determine where blockchain and digital asset technology could be applied, and how it would be interwoven into our daily lives. At this time, Bitcoin held over 50% crypto market dominance, having virtually solidified its standing as the digital gold standard. However, once bitcoin had staked its claim on the world economy, the so-called "altcoins" soon followed, becoming far less "alt" as their potential began to be illuminated by widespread investment. Individuals and corporations across the world began investing in major coins such as Ethereum, Binance coin and even impractical coins made as jokes (meme coins) such as Dogecoin.

Gem Guard Wallet Mission is to address these challenges by building the tools necessary to draw the average economic participant into the crypto world and guide them through integrating crypto into their everyday life. Powered by Binance Smartchain technology apparatus, the Gem Guard ecosystem boasts a uniquely strong standard of security that sets it apart from competitors.

Gem Guard as Wallet

The Gem Guard Wallet enables users with unique experience such as:

- Use FaceID, Touch ID, or conventional passwords to protect your crypto investments and various assets within the platform.
- Protect all online interactions through the app's military-grade encryption enablement.
- Enablement of wallet balance checking, transaction history, date & time and other details all available on your device.
- Special and empowered security.

The app is basically a multi-wallet chain that accepts different blockchain systems including ERC20, BEP20 and the rest, like 3 to 4 different chains will be integrated into the wallet.

° This app will be entrusted with a 100% guarantee of security and safety which will present itself as a number one wallet of global industrial services.

Gem Guard
Wallet

- ° It will also enable live trading and price chart information on desk from the go, on various cryptocurrency exchanges, which is already being worked on at the moment.
- ° The app development and its features are set to be the greatest that has ever been present, setting afar up to be the greatest technology the world is waiting to see with everlasting impact on the global industry in years to come.
- ° It will also serve as a decentralized system of peer to peer, with superb encryption support.
- ° Enablement to explore a decentralized world where you trade all assets anonymously and seamlessly.
- ° Gem Guard Wallet is the world at your fingertips made easy.

Gem Guard Wallet thereby keeping your unique private key, secure and guided with bank-level security, which operate in a military grade of projection.

- The provision of privacy with your funds and safer login with watch-only.

Gem Guard
Wallet

- Check your balance without exposing your software wallet.
- Offers resigned transactions to save your time.
- Enhanced security with two-factor authentication for transacting, transaction limits, and instant payments.

TOKENOMICS

Token Name: Gem Wallet Token

Ticker: GWT

Blockchain: Binance Smart Chain (BEP20)

Burning: 2%

Decimals: 18

Total Supply: 1,000,000,000

Max Supply: 300,000,000

- Fairlaunch Price: \$0.00001

Gem Guard
Wallet

TOKEN ALLOCATIONS

Liquidity:	700,000,000
Community:	150,000,000
Developments:	100,000,000
Reserve:	50,000,000

LITEPAPER OF GDT (REWARD SYSTEM)

The Gem Diamond litepaper aims to educate investors including of Gem Guard Wallet on our vision, strategy and roadmap.

Introduction

We will illustrate in detail our unique way of redistribution mechanisms. It is the next generation of “Dividend yield farming” in decentralized finance.

Gem Diamond and Gem Guard Wallet (GWT) will share equal legitimacy, use case, support and benefits in this program.

Gem Diamond Token will carry the innovation via reward system. We will share our vision — the friendliest and less hassle in auto claim of GWT reward mechanism.

Gem Guard
Wallet

GDT In A Nutshell

Gem Diamond is the next generation of a yield—generating contract on the Binance Smart Chain (BSC): you get rewarded in GWT instead of Gem Diamond tokens. 15% of every transaction is split in three:

7% GWT is redistributed to holders

3% is used to fuel the liquidity pool exchange growth

5% GWT is allocated to buyback/ marketing wallet

Classic Redistribution

This is a concept that was popularized by Safemoon. The mechanism incentivizes token holders to hold in order to earn dividends from the transactions (buy and sell). Redistribution is based on percentage (in the contract), current token balance and number of holders. TL; DR: You receive more tokens automatically.

Gem Guard
Wallet

GWT redistribution — How it works?

We created a unique system that auto claims for every single holder the amount due.

The way it works for holders:

You buy tokens and hold them, every 60 minutes you'll automatically receive GWT in your wallet. Not a single action is required.

Your Gem Diamond Token amount is persistent and won't change.

Gem Guard Wallet — As Project

Gem Guard Wallet is a multi-coin crypto wallet that securely stores your crypto assets in the most simple and easy way. Truly mobile friendly, supporting major currencies like Bitcoin, BNB, Ethereum, Ripple and more.

Gem Guard
Wallet

Gem Diamond Token Codes – Behind The Scenes

The contract keeps track in an array of all token holders. Every transaction process a certain number of users, depending on the transaction size (bigger token transfers can process more, since the gas will still be proportionally less than the value of the tokens).

The token is based on a Dividend-Paying Token Standard, which means all Gem Guard Wallet (GWT) the contract gains will be split equally proportionally to the token holders. When a user is processed, the contract checks how many withdrawable dividends they have, and if it is above the minimum threshold for auto-claims, will either automatically claim those dividends for GWT, or automatically buy back tokens for them.

Other Features

Anti-Dump Logic

Price protection features such as max transactions on sells are included. Any transaction selling more than 0.2% of total supply will be rejected. This prevents massive one time sells that drastically alter the token price.

Extra 1% sell fee swing trading is a common practice that can affect price action. To incentivize holding and reducing pump/dump dynamics, we added an extra 1% sell fee on top of the initial 15% transaction fee.

Gem Guard
Wallet

Next Step

We will do a crowdfunding; a quick token sale will be conducted, and everyone is welcome to join. More informations will be posted in Gem Guard Wallet main telegram chat.

ROADMAP

Q4 - 2022

- Preparation Stage
- Planning
- Concept creation
- Initiation of the project
- Project introduction
- Gem Guard Wallet early access
- Expanding of users
- Marketing and partnerships
- Fairlaunch
- Pancakeswap Listing
- Livecoinwatch Listing
- Nomics Listing
- Coinpaprika Listing
- Coingecko Listing
- Coinmarketcap Listing

Gem Guard
Wallet

Q1 - 2023

- Gem Wallet and Gem Diamond Token staking
- Opening of NFT pools
- NFT stake/farm
- Website improvement
- New version of wallet app
- Improved UI and security
- More features to be added

Q2 - 2023

- Top 10 wallet for all crypto users
- More developments
